

Assignment No: 01

```
Package edu;
```

```
public class University {
```

```
    Private string name;
```

```
    Private string location;
```

```
    Public University (string name, string location) {
```

```
        this.name = name;
```

```
        this.location = location;
```

```
    }
```

```
    Public string getLocation () {
```

```
        return location;
```

```
    }
```

```
    Public void display info () {
```

```
        System.out.println ("University : + name);
```

```
        System.out.println ("location : + location);
```

```
    }
```

```
}
```

Package mainpack;

import edu.university;

public class mainuniversity {

public void main (String[] args) {

University uni = new University (

"MBSTU", "Tangail");

uni.displayInfo ();

}

}
